

## Solutions to protect your pendants

- Pendant Armor®, the first shock absorbing, chemical resistant frame designed to protect teach pendants from damage if they are accidentally dropped or pulled from a work surface.
- A simple protective cover can save you hundreds of dollars by keeping your teach pendant intact.
- Pendant Armor® offers protection for the pendant, screen, feet, cables and more. It enhances the teach pendant's durability, functionality and ergonomics in your manufacturing environment.

## ADVANTAGES:

- Protects the teach pendant from drops, spills, and extreme manufacturing conditions.
- Protects the exposed components most often damaged when the pendant hits the ground.
- Reduces additional weight without sacrificing critical protection.
- Designed to allow for custom molding around each OEM's unique pendant architecture.

Currently available for: ABB, Fanuc, Kuka, Universal Robots, Yaskawa, Wittmann
